---

Tim,  
I've been working on this project with Catherine Knott, Adjunct Professor of Anthropology, at the Kachemak Bay Branch of Kenai Peninsula College. Catherine has experience working on similar projects in Africa and in Oregon. We'd like to send you our narrative outline, methodology and draft of interview questions soon, we're adding some things and should be able to do that early next week. Hopefully there will be an EPA budget soon and we can begin to plan travel more concretely including attending the Native Scientist Gathering.  
Would it be appropriate to forward Ann's e-mail to me?

Alan

And thanks for the passage from Boundaries and Passages

Alan: Keep me in the loop. I'm sure I can put together some funding to cover airfare to get you out there. In the meantime I've been looking through my collection of Ann's books and reacquainted myself with this section on fish from Boundaries and Passages. Tim

Thanks so much, I tried calling ms. Moore just this morning. I read your tek project, excellent. This EPA project is a bit up in the air budget wise. If I get an invitation i'll do my absolute best to be there.

Alan: Following is an announcement about a gathering in New Stuyahok that you might find useful for your work with EPA. I have suggested they send you an invitation. It should be forthcoming from a young lady named Apayo Moore. I am going to try to be there.

A few years ago I embarked on a TEK project on the Nushagak with any eye toward identifying areas important to protect for subsistence. Here is a link to that report. You might find it useful.

Do let me know if there is any way I can help you with your work.

Tim Troll

Nunamta Aulukestai is announcing a Native Scientist Gathering May 15-17th in New Stuyahok. The Goal of this gathering is to have 30 elders who are knowledgeable about salmon in the Nushagak and Kvichak Rivers. We will be documenting our findings and presenting the data to the Environmental Protection Agency for their scientific assessment of the Bristol Bay Watershed. If you know any Native Elder Scientists who would be interested in attending, Please call Apayo @ 842-4430 or email <mailto:itsapayo@gmail.com> itsapayo@gmail.com<mailto:itsapayo@gmail.com>
